

How to Install Streaming Apps onto your Android Device

If this installation is an update (you already have xciptv [VTA] and/or iptv smarters apps installed), be certain to uninstall both apps and delete all files in the Downloader Files section before beginning the installation. If this is a brand new installation, please follow the user guide instructions.

Type into the address bar (complete one install at a time for each app; once one is installed repeat the process for the other app) Hit Enter to start the download.

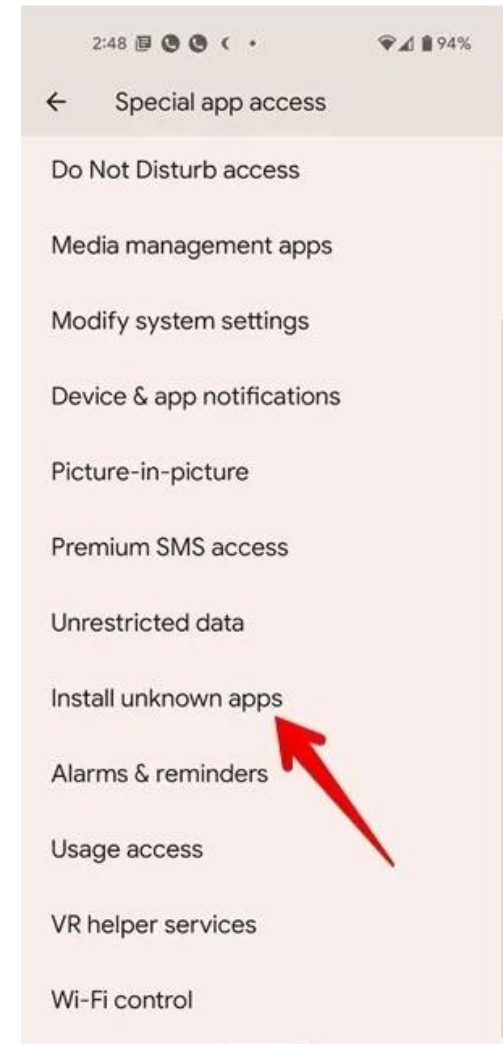

<https://tinyurl.com/VTAXCIPTV> (xciptv app)

<https://tinyurl.com/VTASMART> (smarters app)

Go to “Apps,” then tap on “Special app access.” If you don’t find it, go to “Advanced” followed by “Special app access.”

You will have to allow your device to install unknown apps. Not all Android devices will be exactly the same, you may need to Google your make and model.

Enable APK installations from file manager (downloads folder).

- Go to File Manager (My Files)
- Click on file to install
- Tap OK if prompted

This will confirm your decision and enable downloads from unknown sources. You can now proceed with installing your APK file.
